Merridale Angus

Our exciting Sale will feature a powerful blend of old and new genetics showcasing the strength and adaptability of cattle that Merridale has steadily been growing in number and quality for a number of years. This carefully curated offering represents generations of proven maternal lines such as the famous Vicky, Ester, Wilcoola, Jane and Cydie families which all originated here in Tennyson, combined with the progress of modern performance sires, ensuring both genetic depth and future potential.

With the current climate, as we rely on irrigation and have been only issued with 50 % of our water right, we made the decision to lighten our load. Hence, we are selling every cow older than Q and above. There are a number of older cows that will be offered at a later date when they have finished rearing their ET calves. This sale represents a unique opportunity for breeders to secure females that will assimilate effectively to drive longevity and productivity into your herd.

Peter & Brodie Collins
